

SafeTac AS - 9 Programmable Internal DC VRD

Suits Lincoln 400AS - 50 , SAM 400 & 500AS - 50

Note : For older 400AS or 500AS use UM1 - AB

Replaces older AS-7 , AS - 8 VRD with programmable VRD turn on time
AS - 9 has replaceable external switching device rather than replace entire VRD in the event of switching device failure .

Control power input 10 to 32 VDC (From Ignition circuit)

Drops voltage only (To around 25 VDC) resulting in fast full current starts & Automatic Voltage Sensing wire feeder operation .

VRD Turn on time : 300Ms (Programmable)

Indication : Green Low OCV VRD on Red or Flashing red high OCV.

Shipping package : Length : Width : Height : Weight : Kilo
